

Data Analytics with Python Course

Course Overview

The **Data Analytics with Python Course** is a comprehensive, job-oriented program designed for students, graduates, and working professionals who want to build a successful career in Data Analytics and Business Intelligence. This course covers **Python Programming, SQL, Microsoft Excel, Advanced Excel, Power BI, Data Visualization, and Real-World Analytics Projects**. Students will learn how to collect, clean, analyze, visualize, and present data to solve real business problems using industry-standard tools.

Course Duration

- **Duration:** 7 Months
- **Mode:** Online / Offline
- **Live Projects:** 12+
- **Assignments:** 100+
- **Case Studies:** 20+
- **Certificate:** Included
- **Placement Assistance:** Included

Course Fee Structure

Course Module	Duration	Fee
Python Programming for Data Analytics	2 Months	₹7,500
SQL (MySQL)	2 Months	₹7,000
Microsoft Excel & Advanced Excel	2 Months	₹7,000
Microsoft Power BI	2 Months	₹10,000
Complete Data Analytics Course	7 Months	₹31,500

Course Curriculum

Module 1: Python Programming for Data Analytics

Python Fundamentals

- Introduction to Python
- Variables & Data Types
- Operators
- Conditional Statements
- Loops
- Functions
- Lists, Tuples, Dictionaries & Sets
- File Handling
- Exception Handling
- Object-Oriented Programming (Basics)

Python for Data Analysis

- NumPy
 - Pandas
 - Data Cleaning
 - Data Transformation
 - Data Filtering
 - Data Aggregation
 - Working with CSV & Excel Files
 - Data Visualization with Matplotlib
 - Seaborn Basics
-

Module 2: SQL (MySQL)

- Introduction to Databases
- MySQL Installation
- Database Creation
- CRUD Operations
- SELECT Queries
- WHERE Clause
- ORDER BY

- GROUP BY
 - HAVING
 - Aggregate Functions
 - Joins
 - Subqueries
 - Views
 - Stored Procedures
 - Triggers
 - Indexing
 - Window Functions
 - Database Optimization
-

Module 3: Microsoft Excel & Advanced Excel

Microsoft Excel

- Excel Interface
- Data Entry
- Formatting
- Tables
- Charts
- Sorting & Filtering
- Conditional Formatting

Advanced Excel

- Lookup Functions (VLOOKUP, HLOOKUP, XLOOKUP)
 - INDEX & MATCH
 - IF, IFS, Nested IF
 - Pivot Tables
 - Pivot Charts
 - Data Validation
 - Dashboard Creation
 - Power Query
 - What-If Analysis
 - Macros (Introduction)
-

Module 4: Microsoft Power BI

- Power BI Desktop
 - Data Import
 - Data Cleaning
 - Power Query Editor
 - Data Modeling
 - Relationships
 - DAX Fundamentals
 - Measures & Calculated Columns
 - Interactive Dashboards
 - Charts & Visualizations
 - Filters & Slicers
 - Drill Through
 - Row-Level Security
 - Power BI Service
 - Dashboard Publishing
 - Report Sharing
-

Module 5: Real-World Data Analytics Projects

- Sales Dashboard
 - HR Analytics Dashboard
 - Financial Dashboard
 - Retail Analytics
 - Customer Churn Analysis
 - E-Commerce Analytics
 - Hospital Data Analysis
 - Employee Performance Dashboard
 - IPL Data Analysis
 - Netflix Data Analysis
 - Superstore Sales Dashboard
 - Business Intelligence Dashboard
-

Technologies & Tools Covered

Programming

- Python

Database

- MySQL

Spreadsheet Tools

- Microsoft Excel
- Advanced Excel

Business Intelligence

- Microsoft Power BI

Python Libraries

- NumPy
- Pandas
- Matplotlib
- Seaborn

Development Tools

- Visual Studio Code
- Jupyter Notebook
- MySQL Workbench
- Power BI Desktop
- Microsoft Excel
- Git & GitHub (Basics)

Live Projects

- Sales Performance Dashboard
- HR Analytics Dashboard
- Financial Analysis Dashboard
- Customer Segmentation

- Retail Business Analysis
 - Inventory Analysis
 - Healthcare Analytics
 - IPL Data Analysis
 - Netflix Data Analysis
 - E-Commerce Analytics
 - Superstore Dashboard
 - Final Capstone Data Analytics Project
-

Career Opportunities

After completing this course, students can apply for roles such as:

- Data Analyst
 - Business Analyst
 - Power BI Developer
 - SQL Developer
 - Reporting Analyst
 - MIS Executive
 - Business Intelligence Analyst
 - Junior Data Scientist
 - Analytics Consultant
 - Data Visualization Specialist
-

Prerequisites

- Basic Computer Knowledge
 - No Programming Experience Required
 - Suitable for Students, Freshers, Graduates, and Working Professionals
-

Certification

Upon successful completion of the course, students will receive:

- Data Analytics with Python Course Completion Certificate
- Live Project Certificate
- Internship Certificate (*if applicable*)
- Placement Assistance & Mock Interview Support
