

Java Full Stack Development Course

Course Overview

The **Java Full Stack Development Course** is a comprehensive, job-oriented training program designed to help students become professional Full Stack Java Developers. This course covers modern frontend technologies such as **HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (Core & ES6–ES10), and React.js**, along with backend development using **Core Java, Advanced Java, Spring Framework, Spring Boot, Hibernate, REST APIs, and MySQL**. Students work on real-world projects, build industry-level applications, and receive placement assistance to become job-ready Java Full Stack Developers.

Course Duration

- **Duration:** 10 Months
- **Mode:** Online / Offline
- **Projects:** 18+
- **Assignments:** 180+
- **Certificate:** Included
- **Placement Assistance:** Included

Course Fee Structure

Course Module	Duration	Fee
Web Designing (HTML5, CSS3, Bootstrap & Tailwind CSS)	2.5 Months	₹7,500
Advanced JavaScript (Core JavaScript + Advanced JavaScript + ES6–ES10)	3 Months	₹4,000
React.js Development	2.5 Months	₹8,500
Core Java	2 Months	₹6,500
Advanced Java	2 Months	₹8,000
Spring Framework & Spring Boot	2 Months	₹8,000
Complete Java Full Stack Development	10 Months	₹42,500

Course Curriculum

Module 1: Web Designing

HTML5

- HTML Structure
- Forms & Validation
- Tables
- Semantic HTML
- Multimedia
- SEO-Friendly HTML

CSS3

- Selectors
- Box Model
- Flexbox
- CSS Grid
- Responsive Design
- Media Queries

Bootstrap 5

- Grid System
- Components
- Forms
- Navigation
- Cards
- Modals

Tailwind CSS

- Utility Classes
 - Responsive Layout
 - Components
 - Landing Pages
-

Module 2: JavaScript Development

Core JavaScript

- Variables & Data Types
- Operators
- Loops
- Functions
- Arrays
- Objects
- DOM Manipulation
- Events

Advanced JavaScript

- Scope & Hoisting
- Closures
- Callbacks
- Higher Order Functions
- Prototype
- Object-Oriented JavaScript

ES6–ES10

- Arrow Functions
- Destructuring
- Template Literals
- Classes
- Modules
- Promises
- Async/Await
- Fetch API
- Maps & Sets

Module 3: React.js Development

- JSX
- Components
- Props & State

- Hooks
 - React Router
 - Context API
 - API Integration
 - CRUD Operations
 - Authentication
 - Project Development
-

Module 4: Core Java

- Java Fundamentals
 - Variables & Data Types
 - Operators
 - Loops
 - Methods
 - Arrays
 - Strings
 - Object-Oriented Programming
 - Exception Handling
 - Collections
 - Multithreading
 - File Handling
-

Module 5: Advanced Java

- JDBC
 - Servlet
 - JSP
 - Session Management
 - Cookies
 - Maven
 - MVC Architecture
 - Web Application Development
-

Module 6: Spring Framework & Spring Boot

- Spring Core
 - Dependency Injection
 - Spring MVC
 - Spring Boot
 - Spring Data JPA
 - Hibernate ORM
 - MySQL Integration
 - REST API Development
 - Spring Security
 - JWT Authentication
 - Exception Handling
 - API Documentation (Swagger)
-

Module 7: Database

- MySQL
 - SQL Queries
 - CRUD Operations
 - Joins
 - Views
 - Stored Procedures
 - Indexes
 - Database Design
-

Module 8: Version Control & Deployment

- Git
 - GitHub
 - Maven
 - Docker Basics
 - Railway Deployment
 - Render Deployment
 - AWS Basics
-

Live Projects

- Student Management System
 - Employee Management System
 - Hospital Management System
 - Online Banking System
 - E-Commerce Application
 - Learning Management System (LMS)
 - Inventory Management System
 - Online Examination System
 - CRM Application
 - Final Java Full Stack Project
-

Technologies Covered

Frontend

- HTML5
- CSS3
- Bootstrap 5
- Tailwind CSS
- JavaScript (Core)
- Advanced JavaScript
- ES6–ES10
- React.js

Backend

- Core Java
- Advanced Java
- Spring Framework
- Spring Boot
- Hibernate
- REST APIs
- Spring Security
- JWT Authentication

Database

- MySQL

Development Tools

- Eclipse IDE
 - IntelliJ IDEA
 - Visual Studio Code
 - Git
 - GitHub
 - Maven
 - Postman
 - MySQL Workbench
 - Swagger
 - Docker (Basics)
-

Career Opportunities

After completing this course, you can apply for:

- Java Full Stack Developer
 - Java Developer
 - Spring Boot Developer
 - Backend Java Developer
 - Full Stack Software Engineer
 - REST API Developer
 - Software Engineer
 - Web Application Developer
 - Enterprise Application Developer
-

Certification

Students will receive:

- Java Full Stack Development Course Completion Certificate
- Live Project Certificate
- Internship Certificate (*if applicable*)

- Placement Assistance & Mock Interview Support
